## TO WHOM IT MAY CONCERN

Dear Sirs,

this is to inform you that today CESARE BONETTI S.p.A. Company has purchased from WILLIAMS VALVE ENGINEERING S.r.l. Company any business involving ball valves design, production and sales.

Williams Valve Engineering Co. produces ball valves (Trunnion e Floating) in sizes from 1/4" up to 24" and rating from ASME Class 150 up to ASME Class 2500. Main applications of such valves are in oil and gas, energy, chemical and petrochemical industry.

Cesare Bonetti Co. since 100 years has been producing industrial valves and level gauges. With its trademarks "**BONETTI**", "**BONT**" and "**CMI Pasquini**", manufactures and sells a wide range of stop, check and regulating valves, as well as glass level gauges, magnetic sensor level gauges, electronic level gauges and related signal transmission systems.

Thanks to the acquisition of Williams Valve Engineering Co. ball valves production, Cesare Bonetti Co. adds a new high quality line of ball valves to its present range of ball valves, already manufactured in special types having a patented armoured graphite seats for high pressure & high temperature and for boiler blow down and drain service.

To obtain the best synergy in design, manufacturing and sales processes, all the production facilities belonging to Williams Valves Engineering shall be moved into Cesare Bonetti factory at Garbagnate Milanese.

Starting from today any Williams Valve Engineering's ball valve sales activity shall be managed by Cesare Bonetti S.p.A. Company. Please apply to our sales office department for any need or further information.

Best regards

Garbagnate Milanese/Magenta, 11 July 2005
